

# CUSTOM COLOR ALUMINUM DI-BOND

## ART IN A RAINBOW OF FINISHES

Our manufacturing studios print color-matched hues to our standard brushed aluminum substrate to create unique metallic surfaces.

Artworks printed on custom-colored brushed metallic substrates typically allow some of the unprinted surface to show through, adding a dimension of shimmering texture.

Perfect for creating copper, gold, or antiqued artworks in a wide range of custom shades, this process provides luxury art at a competitive price point.

Interested in a custom metallic finish for your next project? Request a sample or connect with our team to get started.
